

Map Viewer

Browse GeoPlatform.gov data assets to find data of interest. Build a custom map. Upload your own data to the map. Share the map with others.

Why should I join?

GeoPlatform users have access to:

- A one-stop shopping delivering trusted, consistent data and services.
- Authoritative data to support informed decision making.
- Applications and services for governmental and nongovernmental use.
- A shared infrastructure that can host your data and applications.
- A focal point where governmental, academic, private, and public data can be visualized together to inform national and regional issues.

Ask Us

Census Bureau and the National Boundaries Group.

The Census Bureau is the Theme Lead Agency for the Governmental Units, Administrative and Statistical Boundaries Theme. The National Boundaries Group (NBG) and subgroups (Federal Lands Workgroup, Tribal Boundaries Workgroup) function as cross-agency workgroups with its primary co-leads from the Census Bureau and U.S. Geological Survey (USGS). The NBG represents FGDC-recognized stakeholders from all levels of governmental, private industry, academic, and other professional organizations, and explores boundary issues that crosscut or are pertinent to multiple themes. To join the **Community Pages** for the NBG and its subgroups, please contact representatives from the Census Bureau's Geography Division who can answer your questions about the GeoPlatform or point you in the right direction.

JOINING GEOPLATFORM

U.S. Census Bureau,
Geography Division,
Federal Geographic
Coordination Branch (FGCB)

How do I join?

1. Goto <https://www.geoplatform.gov/>.
2. Click on “Sign In” in upper right-hand corner.
3. Click on “Create new account”.
4. Enter your information into the User Registration Page and click “Submit”.
5. The “User created successfully.” message will appear. Check your email for a verification message.
6. Return to <https://www.geoplatform.gov/>.

7. Click on “Sign In” in upper right-hand corner.

8. Select “Log In” and enter your username or e-mail and password.

9. From the drop down menu at the top of the geoplatform.gov page, select “Communities” .

10. To reach a community, a second sign-on is required. Click on the “Sign In” in the upper right-hand corner. Review and adjust your account settings as needed, then press “Save”.

11. Select “Communities/Agencies” at the top of the geoplatform.gov page.

11. Select “Governmental Units, and Administrative and Statistical Boundaries” in the A-16 National Geospatial Data Asset (NGDA) Theme Communities in the center-left of the Communities and Agencies Pathway page.

11. To join the NGDA Government Units Community, select “Request group membership” on the right-hand side of the page.

12. Enter your justification to join the Government Units Community and click “Join”.

13. The administrator will review your request for membership and will respond to you with an email.

14. Log in again, if needed. Return to the theme’s page by selecting “Communities/Agencies” at the top of the geoplatform.gov page.

15. To reach a community, a second sign-on is required. Click on the “Sign In” in the upper left-hand corner. The “Sign In” icon will change to “My Account”.

16. Theme membership will give you access to all the theme’s workgroups.
